## Build powerful team collaboration apps on Atlassian Cloud and compete for **\$315,000 in prizes**

Atlassian's Codegeist is back in a big way for 2020. This year, we're looking for creative cloud applications in two tracks:

### BUILT WITH CONNECT

Create production-ready applications and integrations for your favorite Atlassian Cloud tools: Jira, Confluence, Bitbucket and more. Think about solutions that would help your team work smarter or pick a topic of your own that inspires you.

Plus, use the Trello customization platform to build Trello Power-Ups and compete for the corresponding bonus prizes!

### BUILT WITH FORGE

Atlassian's new cloud app development platform, Forge, allows you to build trusted, scalable apps in as little as a few hours with Atlassian-hosted compute and storage, eliminating the need to manage infrastructure or security. Forge is still in beta so join the waitlist using referral "Codegeist" to get access and start building.

**Bonus:** The top 100 eligible Forge apps will win \$500!

We can't wait to see what you build!

This hackathon has ended.

## Showcasing the Lively Recorder

Did you know you can add all kinds of cool things to this page, like a table of contents, date, or roadmap?

Type / to open a list.

***This is a video.***

***Watch the presentation to see it.***

# Insert the recording macro into a page to start a new recording

[/recording](#)

**Recording**  
Record and insert an audio, video, or screen recording.

Insert Recording

What do you want to record?

**Audio**  
  
Select a microphone and make a voice note.

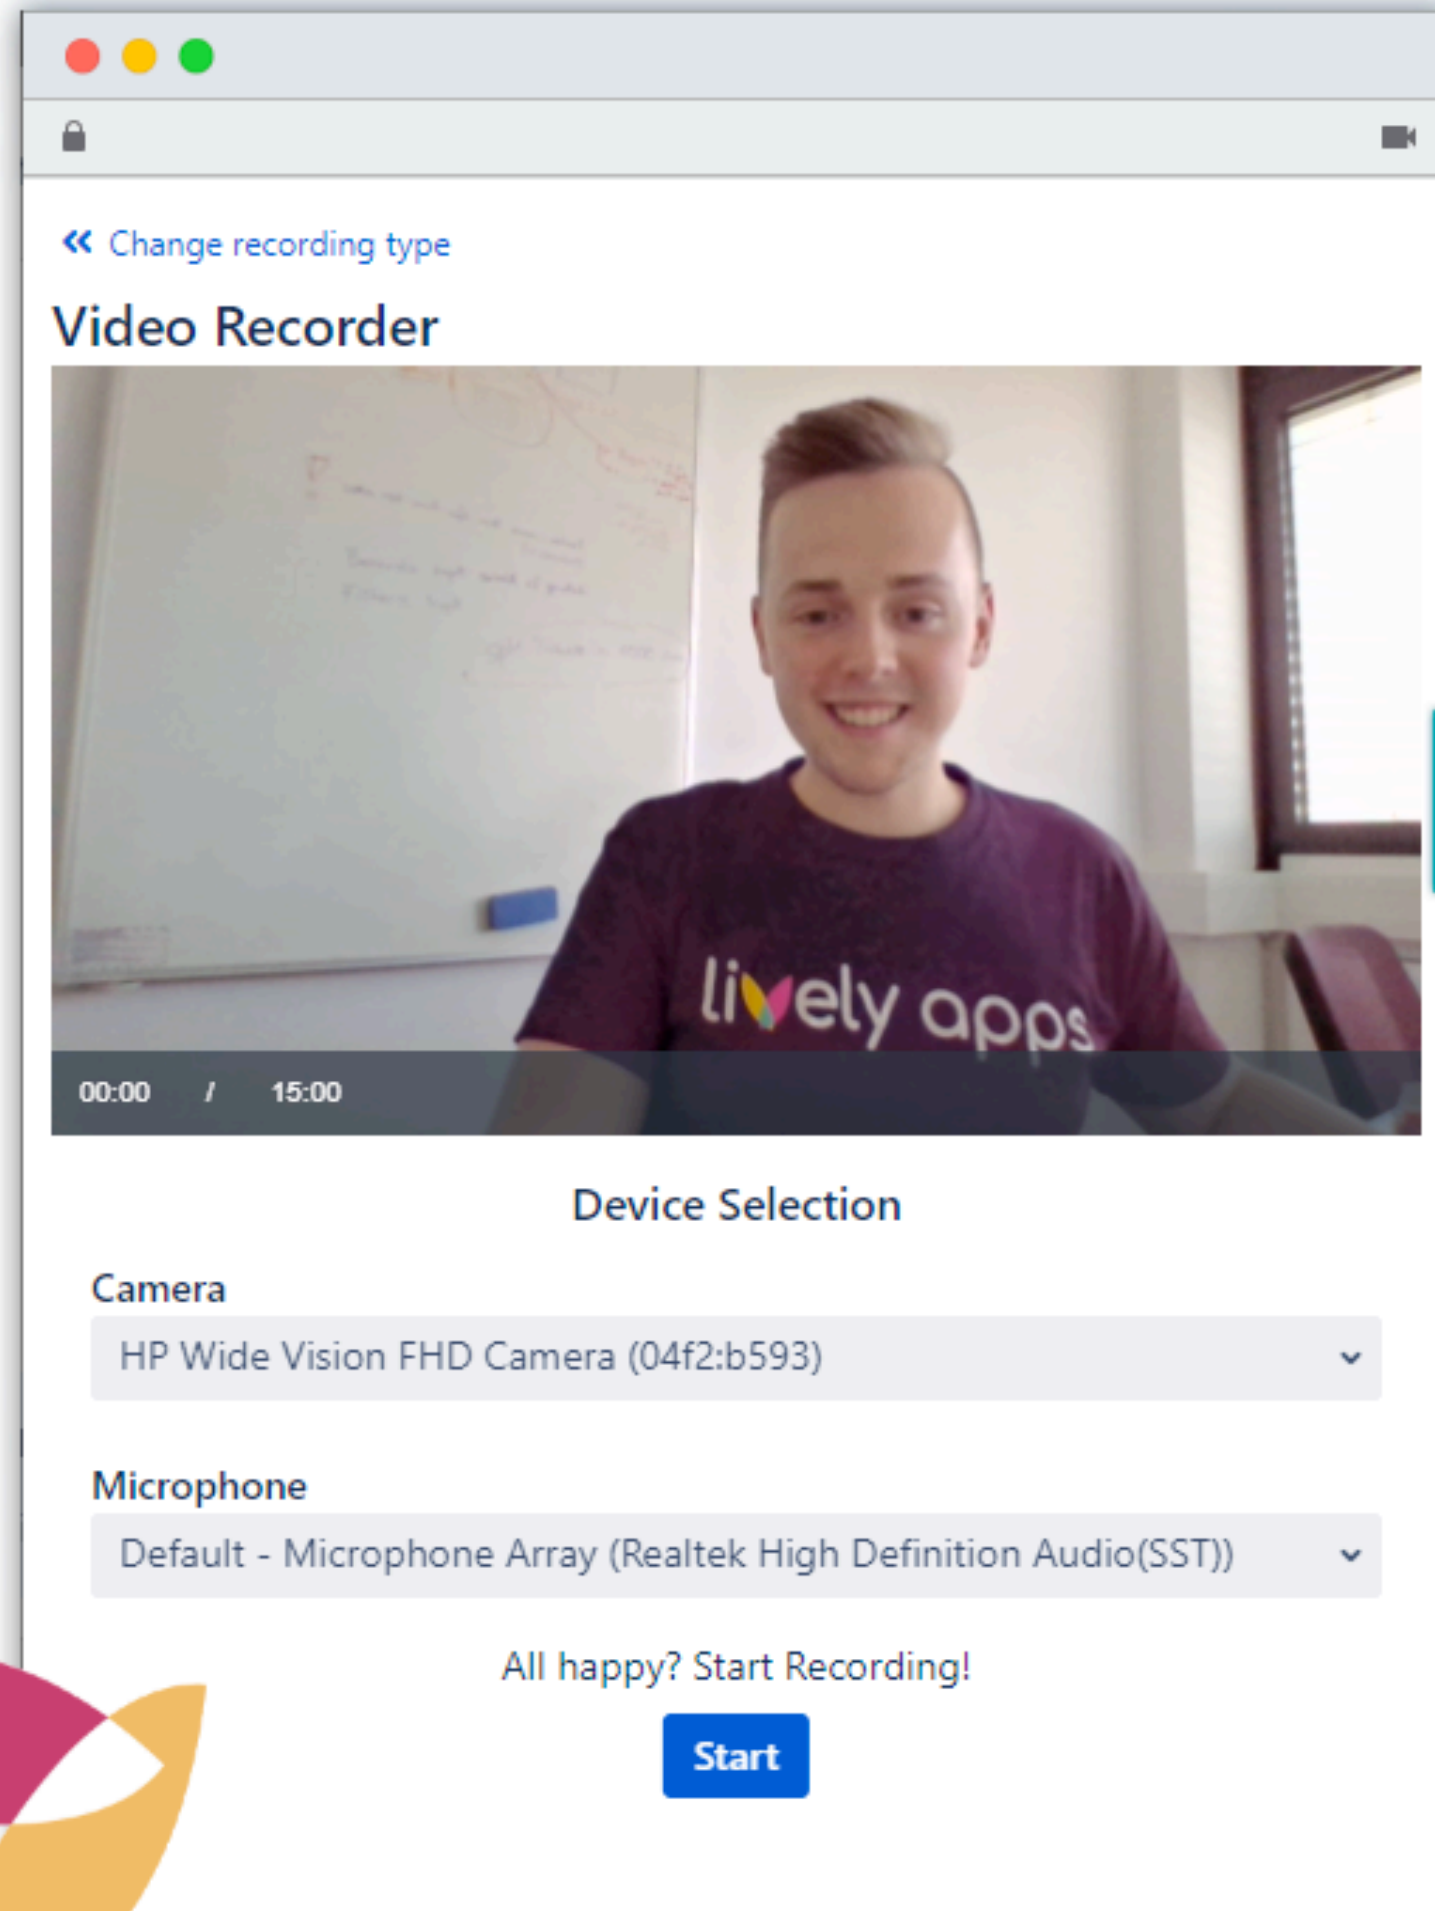

**Video**  
  
Record a video from the lens of your camera.

**Screen**  
  
Pick a window and record your monitor as you see it.

**lively apps**

**Insert** Cancel

## Select the devices you want to record

Change recording type

### Video Recorder

00:00 / 15:00

**Device Selection**

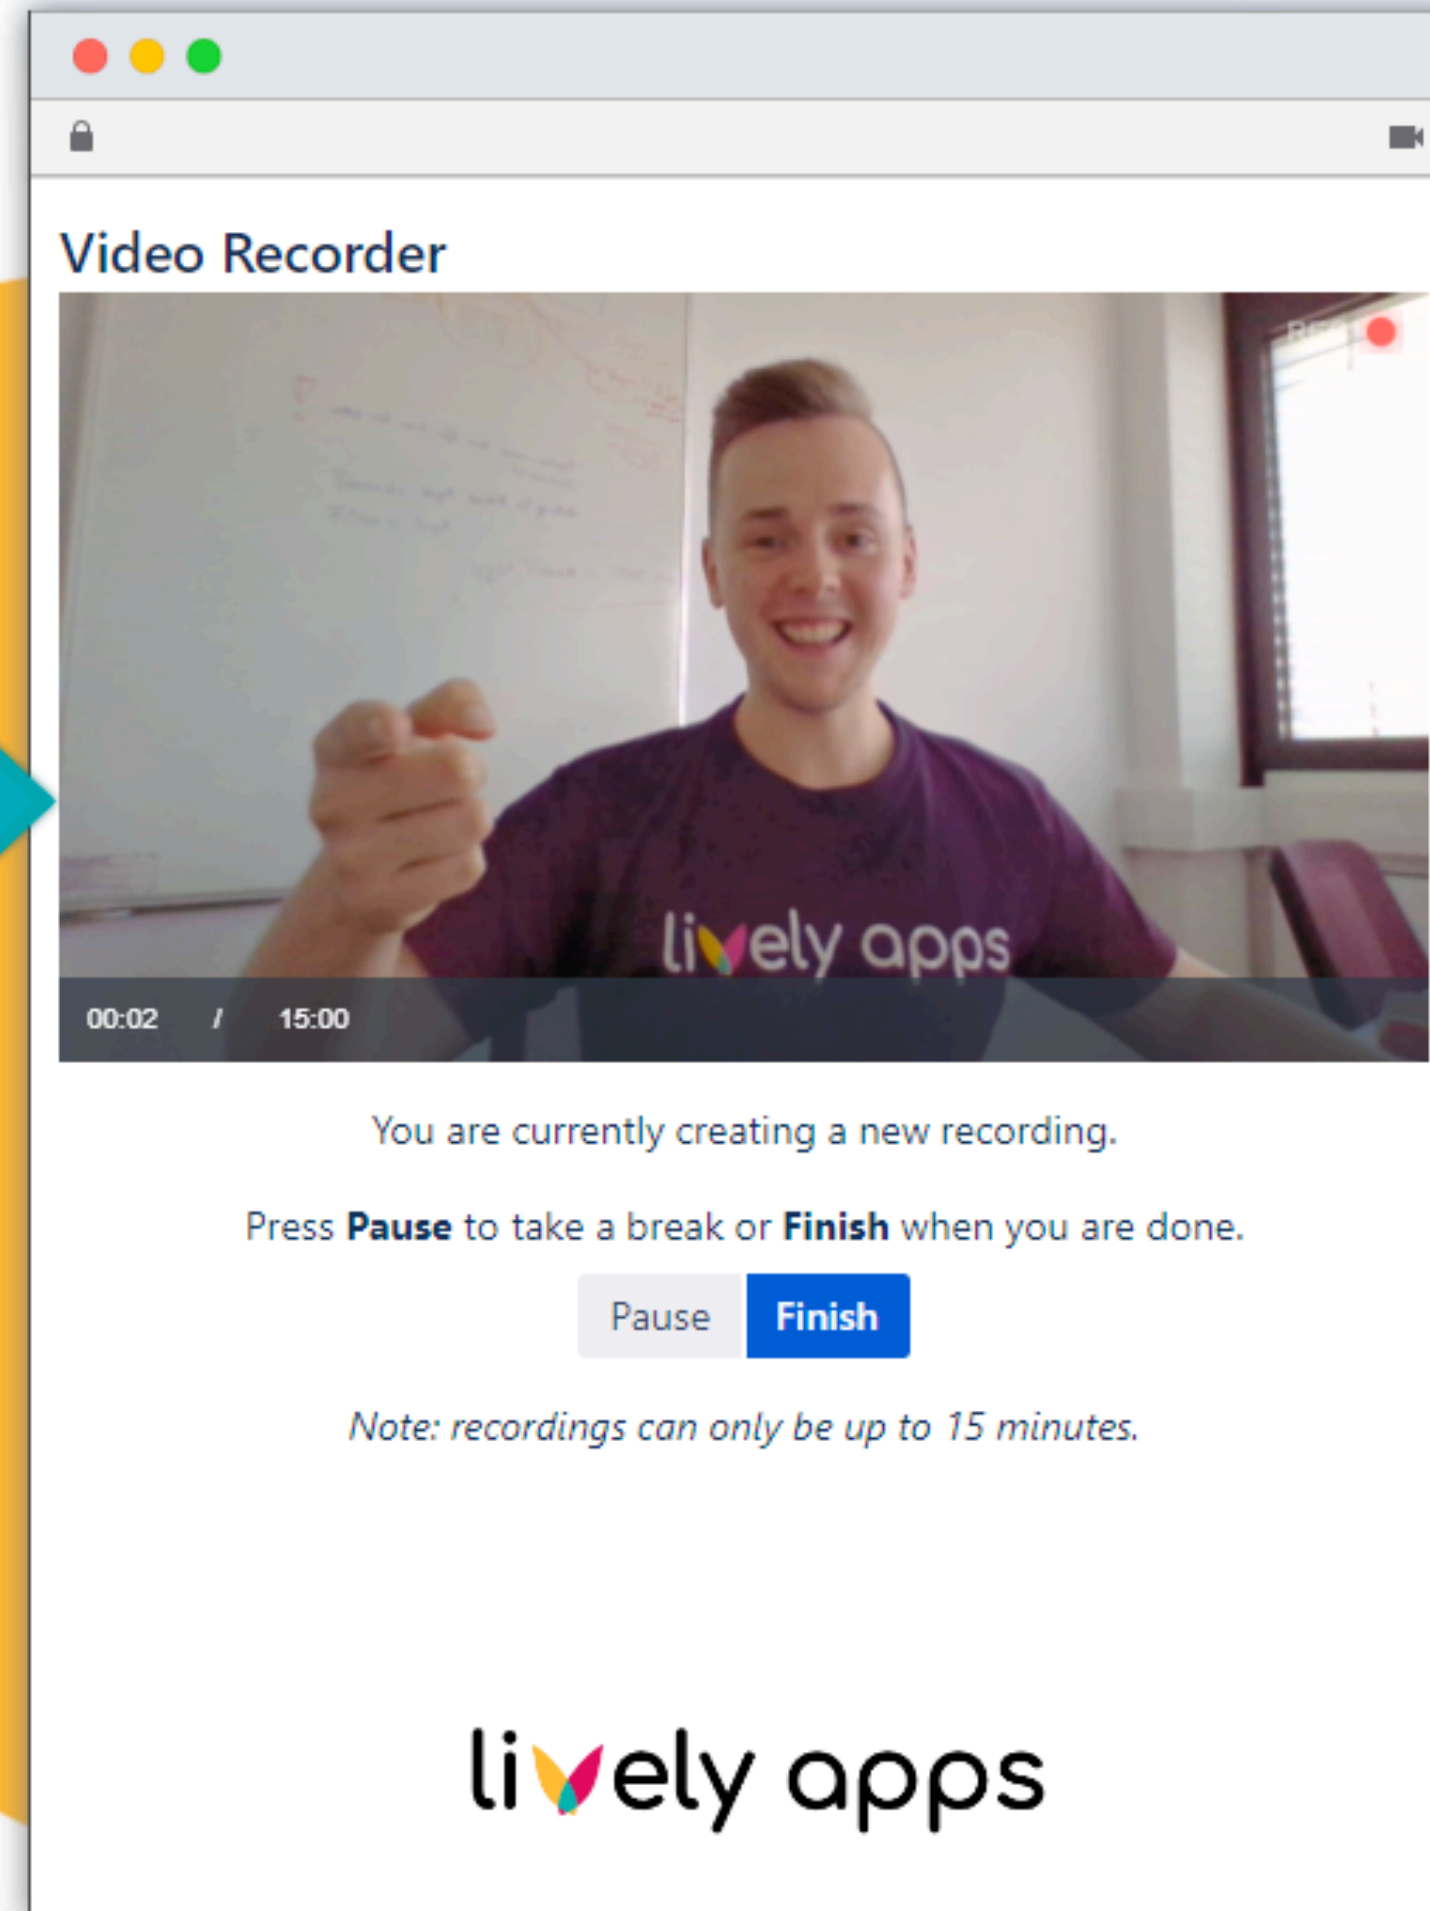

**Camera**  
HP Wide Vision FHD Camera (04f2:b593)

**Microphone**  
Default - Microphone Array (Realtek High Definition Audio(SST))

All happy? Start Recording!

**Start**

## Record yourself

### Video Recorder

00:02 / 15:00

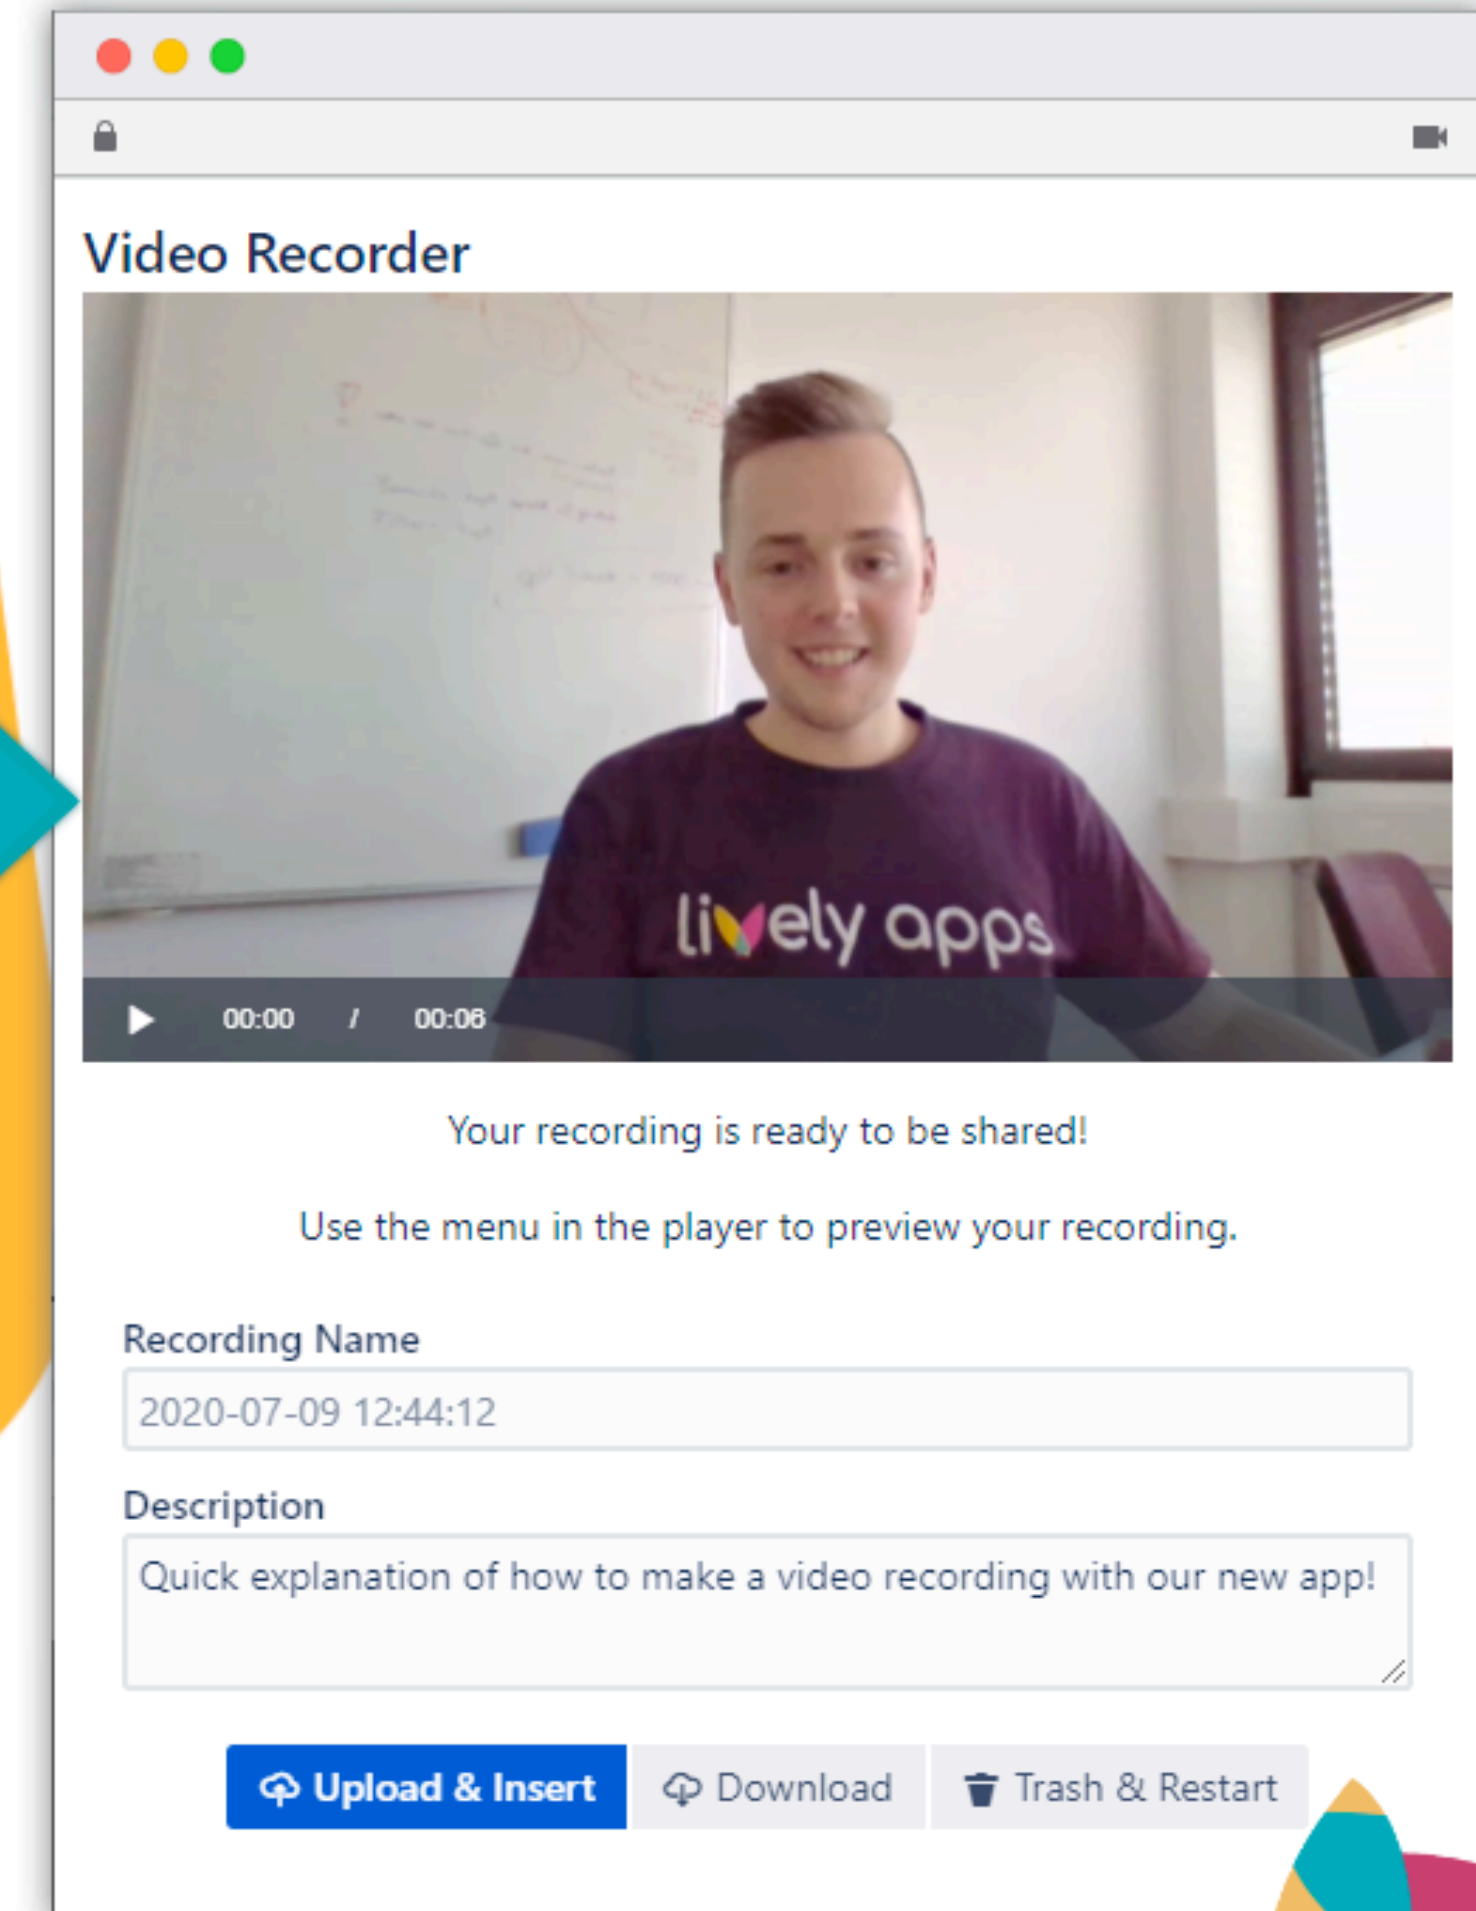

You are currently creating a new recording.  
Press **Pause** to take a break or **Finish** when you are done.

**Pause** **Finish**

*Note: recordings can only be up to 15 minutes.*

**lively apps**

## Upload the result and insert it into your page

### Video Recorder

00:00 / 00:08

Your recording is ready to be shared!  
Use the menu in the player to preview your recording.

**Recording Name**  
2020-07-09 12:44:12

**Description**  
Quick explanation of how to make a video recording with our new app!

**Upload & Insert** **Download** **Trash & Restart**

## Lively Recorder Settings

### Welcome to the Lively Recorder settings!

To be able to use the recorder, you need to request a bucket first. This means you are able to decide where in the world your recordings will be stored. Be careful though, as you will not be able to change the location anymore after you have requested a bucket.

Bucket Region\* US East (N. Virginia)

Select where your recordings should be stored. Available regions correspond to the [AWS regions](#).

⚠️ Once you have requested a bucket, its region can NOT be changed anymore!

Request bucket

Control where your recordings are stored

(Data Locality)
